

Project Update: May 2022

ACTIVITY.; Capacity building and sensitisation of monitoring programme for otter to rangers on the Ramsar site. A 2-day workshop was conducted training on otter ecology and anatomy as well as tracking and data recording was in place. The workshop included beach management units' leaders such as the fisherman seen, districts game officer where the Ramsar site presents such as Kilombero, Ulanga and Malinyi. Given the access and nature of the dam during wet season rangers and fishermen who will participate in the data collection of the current project will gain experience of the training in a more practical way.
