

Project Update: June 2010

The project community mobilisation exercise started on the 24th May, 2010 and is still ongoing. We started by holding a meeting with the chief of Obambo location at a "Baraza". During this meeting the project was discussed with community members on how we are going to work together and what role each member is going to play. The community members are more willing and interested in the project. The meetings have been held informally. The community members are looking forward to go through trainings on environment issues and carry out the reforestation exercises.

Through the help of the chief, we have managed to form five groups consisting of 20 community members. The groups are mixed consisting of women, youth and men. While some are solely youth groups and women groups like "Rid Wiyi" women group. The project aims at forming 10 groups of 20 community members by the end of the mobilisation exercise.
