

Project Update: October 2010

The community training sessions have so far been going well with the community members representing the areas around Akara hills; these include Kadenge, Kadhayi, Kanyaboli. During the training sessions most of the community members raised questions on tree nursery preparation and agro-forestry issues. The forestry department sent in one of their staff members to teach the community on nursery preparation while issues of agro-forestry were presented by our team members.
