Have you seen a Cetacean recently? Yes, then please contact us!

Thanks,

Cetacean Conservation Project

Cetacean Conservation Project

Recent evidence indicates that significant, previously unstudied populations of over 20 species of whale and dolphin occur within the Pakistani EEZ (NE Indian Ocean).

The Cetacean Conservation Project (CCP) will undertake surveys urgently needed to determine their abundance, diversity, and seasonal habitat use, assess the status of pelagic environment and their document threats their to populations.

The CCP will develop management options and recommendations, helping to fulfill our National Conservation Strategy.

It will emphasize, through Karachi University, capacity building and training of Pakistani students, academics and fisheries officers.

Sustainability will be achieved by establishing, with WWF-Pakistan, national an active cetacean conservation group.

What are Cetaceans?

- Cetacean is the collective name for whales, dolphins, and porpoises
- ■They are mammals, like us, and need to breath air

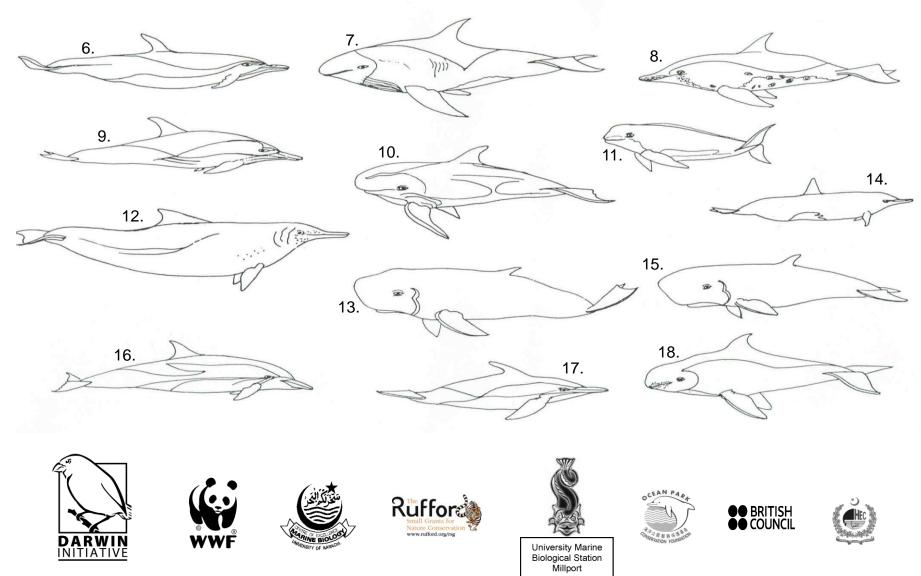

Bottlenose dolphin Photos: R Culloch

- ■They live off the coast of Pakistan, which is part of the Indian Ocean Sanctuary (IOS)
- Cetaceans are an important part of Pakistan's marine biodiversity
- Cetaceans do have problems with their ecosystem due to pollution, being caught accidentally in nets, a lack of food, being hurt accidentally by propellers, and degradation of their habitat

■They are endangered and are listed on the IUCN Red List and CITES We can identify individuals by their fins: 'Flipper' 'Hoops Common dolphin Photo: R Culloch

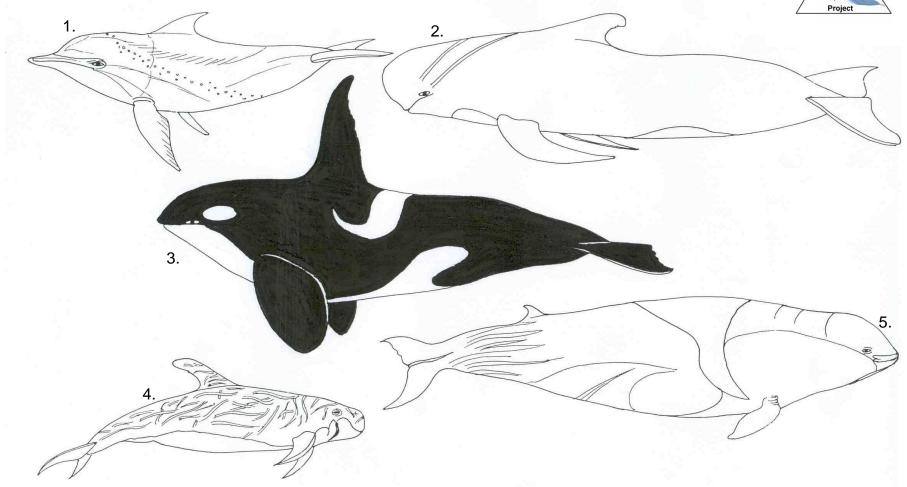

CETACEAN CONSERVATION PROJECT

1. Tursiops truncatus (Bottlenose dolphin), 2. Globicephala melas (Long-finned pilot whale), 3. Orcinus orca (Killer whale), 4. Grampus griseus (Risso's dolphin), 5. Ziphius cavirostris (Cuvier's beaked whale), 6. Stenella attenuata (Pantropical spotted dolphin), 7. Peponocephala electra (Melon-headed whale), 8. Steno bredanensis (Rough-toothed dolphin), 9. Delphinus delphis (Short-beaked common dolphin), 10. Pseudorca crassidens (False killer whale), 11. Neophocaena phocanoides (Finless porpoise), 12. Sousa chinensis (Hump-backed dolphin), 13. Kogia breviceps (Pygmy sperm whale), 14. Stenella longirostris (Spinner dolphin), 15. Kogia simus (Dwarf sperm whale), 16. Stenella coeruleoalba (Striped dolphin), 17. Delphinus capensis (Long-beaked common dolphin), 18. Feresa attenuata (Pygmy killer whale).
