

## Project Update December 2025

**Rufford I.D.:** 48114-1

**Project Title:** By-Watch: Understanding Chilean Dolphin (*Cephalorhynchus Eutropia*) in Caleta Llico

### **Update:**

During this initial phase, all essential equipment required for the project has been successfully purchased, contacts with local service providers have been established and the team of volunteers has been selected. These preparatory steps have allowed us to move forward efficiently with the planned activities.

We have also completed the first field survey, marking the formal start of fieldwork. This initial outing enabled us to begin systematic observations in the study area, test field logistics, and strengthen coordination among team members and local collaborators.
