

Project Update April 2026

Rufford I.D.: 50606-1

Project Title: Seabird and Shorebird Monitoring in Two Key Threatened Ecological Areas in Maule, Chile: Education, Birdwatching and Citizen Science for Conservation

Update:

In the two monitoring surveys carried out by the project—the first on March 21st and the second over the weekend of April 25th—700 and 500 Inca Tern individuals were recorded respectively. This is the highest count ever recorded for the Maule Region.
