

## Project Update: October 2011

I have accomplished a great activity of Mahseer fish rehabilitation in collaboration with two different institutions. I have established a very good link with The Directorate of Coldwater Fisheries Research (Indian Council of Agricultural Research, a premier Institute dealing with research and development of Mahseer fishery in India. Secondly, I have established link with the Department of Fisheries, Government of Arunachal Pradesh. In the recently accomplished work, I have received collaborative help from both the said institutions.

On a provocative proposal from my side to The Directorate of Coldwater Fisheries Research, I had requested for the assistance in rehabilitation of Mahseer in safe and confined aquatic ecosystem. The Director was keen to approve my proposal. The Director also helped to make link with the Department of Fisheries Government of Arunachal Pradesh.

According to my proposal two suitable lakes were selected and the rehabilitation activity was accomplished on 14<sup>th</sup> and 18<sup>th</sup> October 2011.

The activity has got very good credit and was reported in two leading daily news papers. The links are provided below for onward uploading on my page
