

Project Update: May 2011

On Friday 3rd June 2011, all ICOSCAD project members had the evaluation meetings to assess the overall impact of the campaign so far and make changes where needed. In general the campaign went well in seven sectors for the first phase: 70 local leaders and different groups of community have understood the role of ICS as a method of tackle local problems and the constructed Improved Cooking Stoves are being used properly by the selected vulnerable families. In some of the sectors especially Ndola sector there is increase number of new Improved Cooking Stoves constructed by trained local leaders in partnership with their community.
