

## Project Update: June 2011

**Green Fins team expands:** The Green Fins Assessor Training Workshop held in Anilao, Mabini, Philippines on the 15<sup>th</sup> and 16th April 2011 was a huge success with eight new Assessors being fully trained. The event was supported by the Country Team who manage the project as well as the Department of Environment and Natural Resources and was also attended by Conservation International's Country Director.

**Green Fins member get stuck in:** Following the success of the 2-day workshop, the new Assessor team along with new scuba diving operator members have continued to train, assess and support over 50 scuba dive centres in north Philippines. This has encouraged members to join underwater cleanups, make their businesses more environmentally sustainable and educate their customers.

**Green Fins to be at Philippines 1<sup>st</sup> Dive Expo!** The PCSSD have confirmed that they would like Green Fins Philippines to be represented at the Dive Expo to be held in Cebu later this year.
