

## Project Update: August 2011

The study on goods and services has already finished and we have already produced the training manual adapted to primary pupils.

The greatest news is that by the initiative of Burundi Nature Action-BNA (our NGO) the government of Burundi has recently adopted a decree project establishing Magalarazi wetlands boundaries as a protected area. It is an achievement of our NGO (BNA) with support of EGP IUCN and CARPE/IUCN and of course Rufford. With these supports we have been able to lobby until this decree has been adopted.
