

## **Project Update: September 2011**

### **Field research**

During the breeding season 10 breeding and three resident species have been monitored. The field research was done by team members, two members of OS "Our birds" and a member of Croatian "BIOM". Field research started on May 27<sup>th</sup> 2011.

### **Educational material**

Illustrations were done by a local artist and educational text and photographs by team members and collaborators. The material will be distributed on workshops with high-school students and hunting associations.

### **Contact with local ministry, hunting associations, high-schools**

The contacts were found on internet. Stakeholders were contacted by phone to set up the dates of the workshops. The ministry of science, education, culture and sport (Hercegbosanska County) was contacted to get the needed permits.

### **Media support**

Local radio stations and web portals were contacted to follow the project progress.
