

Project Update: March 2017

After launching the project, the project team developed questionnaires and 91 people were consulted. The terrain work for making these interviews was carried out from November 2016 until February 2017. During this process we received much important information and suggestions for further implementation of the project.

Until now, two meetings were organised, the first in Donji Milanovac and second in Dobra (both places within NP Djerdap territory). At our first meeting we had 15 people participating and at the second 11. In both meetings we used the same approach - in the first part of the meeting we presented processed data received from questionnaires, and participants could give their inputs during the discussion. All relevant information was collected and used for development of the guidelines. The guidelines should be finalised in March/April 2017. As well, the initial approach of the project to the local stakeholders set the basis for the upcoming establishment of a communication platform.
