

Project Update: July 2010

The project team is pleased to report that so far eight sensitization meetings were held in the following areas:- Mwase, Mgwazo, Mgubudu and Changeta on the Zambian side of Kasungu Wildlife Reserve (KWR). In each area, two meetings were held, one targeting local traditional authorities and another one targeting local communities who live around KWR. The main aims of the meetings were to make the chiefs and the general public aware of the project, project goals and expectations, including lobbying for their support. The project team is pleased to report that 80% of the people who attended the meetings were in full support of the project and expressed interest in joining the project team in implementation of activities.
