

## Project Update: April 2010

We have so far organised two nature camps, one in Banni grasslands on 10th March 2010 and one on the Modhva coast on 22nd March 2010.

The Native Flora Nursery at CEDO is ready. *Salvadora persica* plants have been raised by us. The rainwater harvest tank of 30,000 litre capacity is also ready; we have diverted the roof-top water to store the rain water in the tank.

Schools are on vacation now. Our plan for remaining eight nature camps will begin after 10th June 2010, and the plants are ready to be planted in the monsoon period (July-September 2010).
