

## Project Update February 2025

**Rufford I.D.:** 40926-1

**Project Title:** A Comparison of Population Genomics and Demographic Histories of Two Southern African Pipefishes

**Update:** Our pipefish genomics project is progressing well. We have finished collecting samples for both DNA and eDNA in Namibia and South Africa, completed the DNA extraction process, and sent the 96 samples for sequencing. We are now waiting for the Whole Genome Sequences to begin our data analysis. In addition, we have successfully tested the eDNA primers. With these validated primers, we will be able to determine species locations effectively.
