

Project Update July 2025

Rufford I.D.: 43681-1

Project Title: Conservation and Community Engagement for the Endangered Woolly Flying Squirrel (*Eupetaurus Cinereus*) in the Uttarakhand Himalayas

Update: We have successfully deployed camera traps in selected locations within the study area. However, due to adverse weather conditions at higher altitudes, we are facing some challenges in moving from one site to another. That said, we remain hopeful that the weather will improve soon.

In the meantime, we have initiated questionnaire surveys with local communities to gather information on the target species.

Please find attached a few photos from our recent field activities.

Latitude: 30.668528
