

Promoting Community Based Conservation Efforts in Lower Humla Nepal

1. Household Surveys:

We have conducted all the planned household surveys within the Sarkegad Rural Municipality on human-wildlife conflict. Here are some of the photos from the field site.

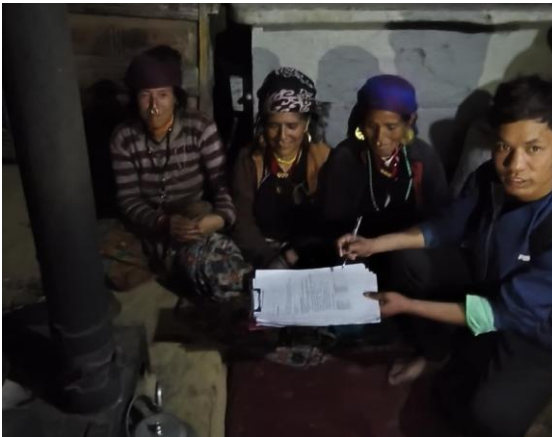

Figure: Household survey on Human-wildlife conflicts with the local of Sarkegad Rural Municipality, lower Humla.

2. Eco-clubs Formation

Two eco-clubs at two high schools have been formed with the participation of students and teachers. The aim is to educate and empower students in environmental conservation and leadership development.

3. Documentary Making

The project also aims to capture and share local stories and conservation challenges through a storytelling documentary. A final draft has been prepared and will be released to larger audience through YouTube.

At present, we are compiling all the household surveys data, analyzing them and preparing a final evaluation report.
